
Locations	Canada, United States
Dates	01/01/2013 - Ongoing
Summary	
The problem	Attractive pink flowers make the Eurasian plant flowering rush a popular aquatic ornamental. But since it was introduced to North America it has become an aggressive invader of freshwater systems in the midwestern/ western USA and western Canada. One likely reason for this is the absence of the natural
What we are doing	No effective control techniques are currently available. Flowering rush (*Butomus umbellatus*) was introduced from temperate Eurasia to North America as an ornamental aquatic plant more than 100 years ago. It
